

Signature Forgery Detection System

Comprehensive Training Report

Session ID: 20260201_030759

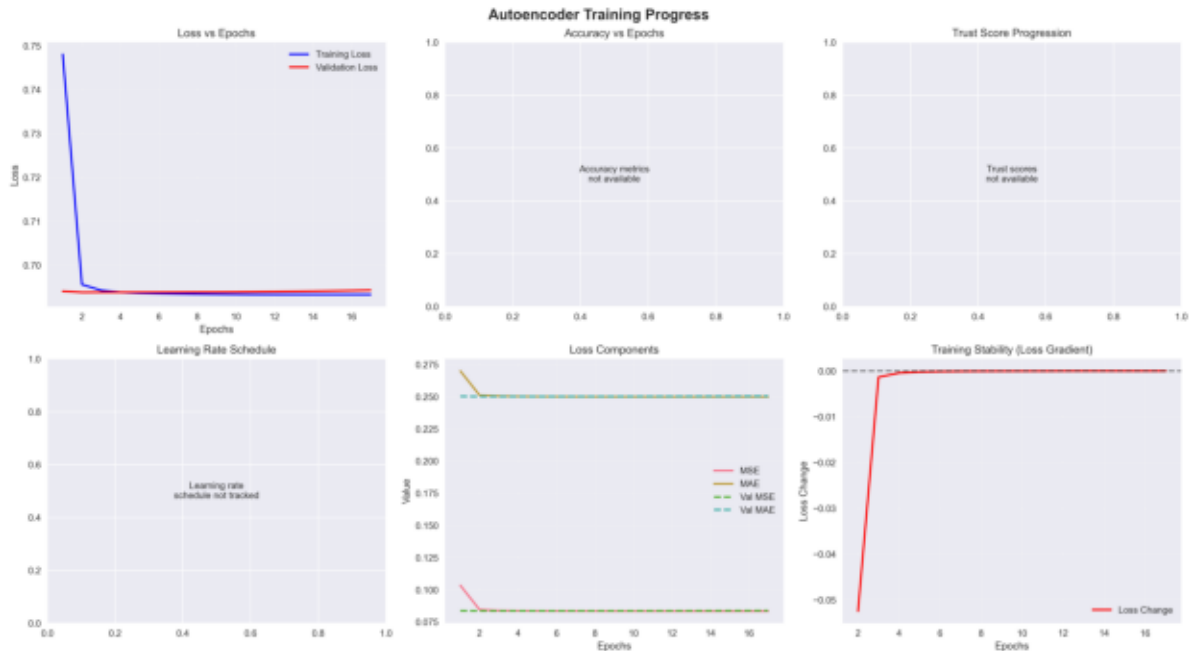

Generated: 2026-02-01 03:13:51

Enhanced Deep Learning Pipeline with Cross-Validation and Trust Score Analysis

EXECUTIVE SUMMARY

This report presents a comprehensive analysis of the signature forgery detection system\ntesting process, including detailed parameter tracking, cross-validation results,\nand trust score analysis for reproducibility and reliability assessment.\n\nCross-Validation Results:\n - Mean Accuracy: 0.527 ± 0.000 \n - Overall Trust Score: 0.773\n\nKey Features Implemented:\n ✓ Comprehensive parameter tracking for reproducibility\n ✓ Enhanced training visualizations (loss, accuracy, trust scores)\n ✓ Stratified K-fold cross-validation\n ✓ Trust score analysis for model reliability\n ✓ Automated report generation
